

Digital Citizenship Pledge

By signing this pledge, I, the student, commit to being a positive, respectful, and safe member of the HIVE digital community and the broader internet. I understand that my actions online have lasting consequences—a permanent digital footprint.

- **I will be kind and respectful to others.**

I will use thoughtful language in all my posts and comments, and remember that there is a real person behind every screen. I will practice constructive criticism and never engage in cyberbullying or harassment.

- **I will not share my password with anyone.**

I understand that my password is the key to my digital identity. I will keep it secret, create strong passphrases, and change them regularly to protect my personal information and account security.

- **I will report anything that makes me feel unsafe.**

I know the importance of seeking help. If I see, hear, or read anything that is inappropriate, threatening, or makes me uncomfortable, I will immediately tell a trusted adult or use the platform's reporting tools.

- **I will think before I post.**

I will pause and review my content before I click "send." I will consider whether my post is truthful, necessary, kind, and if it is something I would be proud to show my parents or teachers.
